I am a Computer Science Engineering student at Shri Ram Murti Smarak College of Engineering and Technology, Bareilly, driven by a passion for solving real-world problems through technology.

Having completed my first year with a 7.9 CGPA, I actively look for opportunities to apply classroom concepts to practical engineering challenges. During my first year, I competed in the Smart India Hackathon (SIH), where I developed an IoT-based Alcohol Detection Auto-Cut Circuit for driver safety. Additionally, I built a machine learning-based Plant Disease Detection software as part of a field project to support agricultural tech.

Beyond technical execution, I excel in fast-paced collaborative environments. My experience leading project teams has helped me hone strong skills in critical thinking, time management, and client relationship management. I am an adaptable learner always looking for the next challenging technical project or internship to contribute to and grow from.

Personal Details

Eligible to work in: India

Highest Career Level: No Experience / Student

Industry: Software Development, Technology

Work Experience

Web Development Intern

Codsoft-Bareilly, Uttar Pradesh

Internship

June 2026 to June 2028

projects-

- quiz maker
- e commerce website
- landing page
- portfolio
- calculator

Education

artificial intelligence and machine learning (B.Tech/B.E.)

shri ram murti samark college of enginnering and technology , bareily-Bareilly, Uttar Pradesh

Full-time | August 2024 to May 2028

Scored: 7

- experience: internship in codsoft
- projects- quiz maker,e commerce website,plant diseases detection

Skills / IT Skills

- C
- JavaScript
- Web development
- Leadership
- Java
- HTML
- Python
- CSS
